

A central glass globe with a world map etched on it sits on a computer keyboard. It is surrounded by several cardboard boxes with yellow tape and shipping symbols. The background is a blurred keyboard.

Wholesale E-Commerce Platform

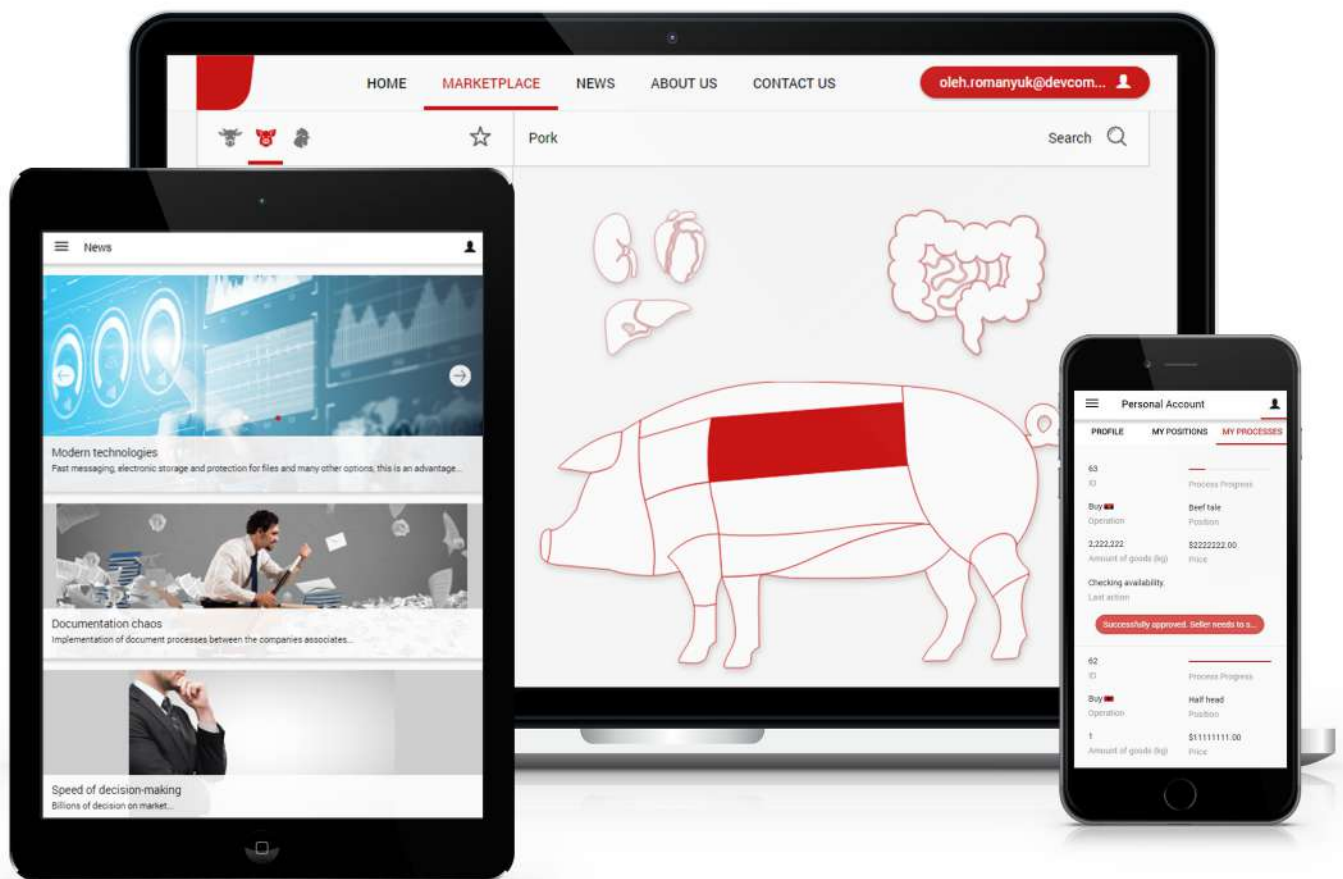

OVERVIEW

The e-commerce platform is a worldwide marketplace for meat products such as pork, beef and poultry. The main point of it is to simplify wholesale purchases and sales of meat products around the world. Additionally, the platform allows secure and easy financial transactions that all connect to the same CRM system. Finally, every user can work with documents and sales statistics within the platform, or just simply export them. The e-commerce solution is a real time saver.

BENEFITS

The e-commerce solution is both an outstanding selling and an outstanding buying point. For sellers, the platform offers an instant access to thousands of users and makes it really easy to sell. **Moreover, sellers get to see the demand on their products and, henceforth, get the best price for it.** As for the buyers, they get access to suppliers from all over the world, and they are able to get the best bargain using the sophisticated matching machine.

In addition, the platform simplifies the sales process with its trading system for both sellers and buyers. To help user, the e-commerce solution, also, provides wonderful analytics for market trends and personal/company statistics. **Last but not least, both sellers and buyers can rest assured that the data and transaction safety is a key priority of the solution.**
